

# The greatest science

Vijay Varma<sup>1,\*</sup>

<sup>1</sup>*Max Planck Institute for Gravitational Physics (Albert Einstein Institute), Am Mühlenberg 1, Potsdam 14476, Germany*  
(Dated: May 10, 2022)

I scienced something, so now you get to read it.

## I. INTRODUCTION

I done did it. Some other people that done'd similar things: [1].

## II. METHODS

Here's how I done'd it.

Figure 1. What happened to Schrodinger's cat?

## III. RESULTS

Here's what I found after I done'd it.  
And Maxwell said:

$$dF = 0, \quad (1)$$

$$d_\star F = \mu_0 J. \quad (2)$$

and then there was light.

## IV. CONCLUSION

Here's what you should learn now that I done'd it.

## ACKNOWLEDGMENTS

We thank Bob Loblaw for useful discussions. V.V acknowledges support from the European Union's Horizon 2020 research and innovation program under the Marie Skłodowska-Curie grant agreement No. 896869. This material is based upon work supported by NSF's LIGO Laboratory which is a major facility fully funded by the NSF.
